NOTES :

Botanical Name is Quercus rubra

Easily interchangeable for American White Oak. It is not as olive-brown in colour as traditional white oak, nor is it pink in colour like more typical American Red Oak. It is more blonde in appearance, closer to that of typical Engineered Oak flooring.

Benchtops cannot be delivered, they are a pick-up item only

NOTES :

All Merbau has pencil round corners.

Merbau will bleed a red/brown coloured tannin which can stain adjacent surfaces.

It should be coated with a minimum two coats of a good quality timber coating before being exposed to rain.

Like all timber in exposed situations regular maintenance should be kept up.

Also available in the Magna Merbau range is Laminated GL13/GL18 Posts and Beams and also decking.

NOTES :

Thermally Modified Pine FSC Certified
Laminated Vertical Grain Orientation and H3 LOSP Treated
Very high grade, some minor imperfections allowed
Availability of specific sizes and lengths cannot be guaranteed.

Like sawn solid timber sizing Vulcan will also have some width and thickness variation
Typical length range 1.8m to 4.8m (not finger jointed)
Allow machining time (as we may cut from larger sections)
See page 31. For finished profiles

NOTES :

Austral Plywood is Australian Manufactured in Australian and is PEFC Certified

** These items are not stocked, leadtime and minimum order will apply

H2 can be used above the Tropic of Capricorn (as opposed to H2S)

Hardwood provides superior durability, stability with excellent impact resistance and nail holding strength.

Structural products are not intended for use in decorative applications. Colour and grain pattern and other allowable characteristics will vary from piece to piece.

When ordering for Pick-Up please specify if you want the sheets left loose for easy handling or strapped together as a mini pack.

NOTES :

We strongly recommend decking be given at least one coating on all four sides prior to installation.

Regular maintenance is necessary to keep a timber deck in good condition.

Merbau will bleed a red/brown coloured tannin which can stain adjacent surfaces.

Most other hardwoods also tannin stain to some lesser extent.

To minimise tannin leach it should be coated with a min two coats of a good quality timber oil before being exposed to rain/water.

All decking can be Intergrain Uni Oil pre-coated in our factory, narrow boards add \$1.15/lm, wide boards add \$1.55/lm (excl gst).

Minimum charge "Set-Up Fee of \$150.00" may apply for small quantities (below 300 LM) of coating.

Note when pre-coating to order we may require up to 10 working days to allow for coating.

Fiji Mahogany has been treated to increase durability, offcuts should not be burned. Please ask for more information.

Approx 50 screws per sqm for 90mm wide decking

Approx 30 screws per sqm for 140mm wide decking

Decking prices can move regularly, please check with our office to ensure you are using an up to date price list.

Our Merbau decking is FSC Certified.

TREX DECKING **now with 50 yr residential warranty**

NOTES :

Whilst EvaLast is a manufactured product variation in grain and colour should be expected. When installing it is recommended that boards be mixed up not just taken from the top of the bundle this is particularly important when more than one pack is being used on a job.

Similarly there will be some variation in board width, care should be taken and allowances made if working to tight tolerances.

Always fully read and follow manufacturers installation guides. www.eva-last.net.au

Note : Joist centres refer to residential applications only.

Note : Clip coverage is approximate only and will vary from deck to deck depending on configuration and joist spacings.

Profile ID	Material	Description	Board width (mm)	Thickness (mm)	Mass (kg/m)	Cover width (mm)	Coverage (m/m ²)	Coverage mass (kg/m ²)

NOTES :

H3 pine framing is either F7 or MGP10, please advise if you have a particular requirement

H3 pine framing is green and a mix of LOSP and occasionally CCA Treated.

Treatment methods are identified with a label or printed on each board.

Be aware colour strength of green treatment will vary from piece to piece.

Be aware CCA treated timber use is restricted in certain applications.

Cladding Screw 304SS 45x4mm (Torx Head Black)	100PCS	15.20/box	

NOTES :

Thermally Modified and H3 LOSP Treated, battens, fins and screening generally have arrised edges

Square Dressed finished sizes will be 1-2mm smaller

Factory Coating will only be applied to bandsawn or brushed finishes.

Availability of specific sizes and lengths cannot be guaranteed.

Typical 145mm Cladding will require approx 30 screws per sqm

Externally we strongly recommend a fine bandsawn finish , internally either bandsawn or smooth/dressed is acceptable
18/02/2025 Ver T1.20.1

Fins and Beams meet GL8 structural rating.

Factory coating of fins and battens poa.

^ Can also be dressed smooth finish but for internal use only, additional charges will apply poa.

Solid - Pencil Round Edges
(Suitable for fully exposed situations)

Laminated, Pencil round edges

Laminated, Pencil round edges

Laminated, Pencil round edges

Notes

Please call to discuss lengths available and lead times for production

Provided slightly over-length to allow final cutting on-site

Will require a final sanding on-site

Not suitable for exposed situations unless specifically noted		
Timber is a natural product variation in colour and grain is to be expected		
Treads should be well sealed all round as soon as practicable		
Some minor laminate separation may occur particularly at the ends of the treads		
this is not considered a defect unless the structural integrity of the tread is impacted.		
Laminate configuration may vary to that indicated		

RECYCLED TIMBERS

We have supply agreements with an established leader in recycled hardwood processing, together we are committed to supporting environmentally responsible building options. Giving us access to some of the most beautiful and the best hardwoods in the world.

These recycled timbers typically come large buildings such as old wool stores, army barracks and wharves. These sites provide a range of hardwood species and sizes that are not readily available in new timber.

Some of the advantages of using our recycled products include:

- Availability of large sizes and long lengths
- Accurate dimensions - square and straight if that is desired
- Environmentally responsible
- Variety of surface finishes
- Very high strength ratings

A comprehensive price list is not available because generally every job is a custom size, finish or grade but below is a selection of recycled material that we attempt to keep in stock. So please call us to discuss your specific requirements.

			Price LM Excl GST	Price Incl GST
Class 1 Durable <u>Poles</u>	200-300mm Dia	3.6m lengths	195.00	214.50

Dressed 1st Grade	85x85mm		34.80	38.28
Jarrah As Is	170x100mm	Enquire	15.00	16.50

NOTES :

VALUE ADDING SERVICES

Austim employ a full-time timber machinist and operate a number of machines to re-manufacture and add value to our timber products and at the same time providing our customers with a better more valuable product specific to their application.

Note we will only machine our own timbers, we are not a custom machining shop.

Machinery list :

6 Head Moulder
4 Sider Planner
Robinson Bandsaw
Buzzer
Thicknesser
Spindle Moulder
Rip Saw
Coating Applicator
Wire Brusher
Flat Bed Sander

Please call our sales team and discuss your particular requirements.

NOTES :

IMPORTANT INFORMATION

General

Please note **pricing may change without notice**, please confirm pricing when quoting and placing orders.
All products and prices offered are subject to availability of stock, please ask for confirmation of availability when quoting or placing order.
Timber is a natural product with variation in appearance from piece to piece being the norm, any samples provided are an indication only of the final product.

Austim do not accept cash on delivery, non account sales will require full payment prior to delivery.
Austim can accept payment by credit card in person, online or over the phone (Visa & Mastercard only)

Any claims in relation to quantity or quality of goods supplied must be made with 7 days of delivery.
a 15% re-stocking fee (subject to a minimum fee of \$25) will be applied to all returns except valid and agreed claims.
All sales are subject to our Terms and Conditions of Sale, available to view on our website www.austim.com.au

Hints for Ordering Timber

Have a cutting list ready of your finished sizes and lengths as we may need to offer an alternative if we do not have your first choice.
We endeavour to keep a good selection of sizes and lengths in our racks however we may have to break open a pack to fulfill your order, this may require extra time.
If you need to colour match for a job or to veneers we must ask that you come in and select the material yourself.

Delivery

Standard delivery to account customers business premises (with forklift off-load facilities) or nominated transport yards

within the metro area \$60 + GST. If Hiab off-load required extra charges will apply.

Customers are welcome to pick up from our huge yard or send their own truck or courier.

Site delivery see next page.

Maximum length delivery with our truck is 9.0M

Longer lengths can be quoted and delivered by arrangement.

Our truck may refuse to unload if the driver deems there to be a safety issue or the potential for property damage in which case he may ask the customer to sign a potential damage waiver.

Ex-Yard Pick Ups

We encourage pick-ups but please make sure your vehicle is adequate for the job.

Consider length and projecting loads, weight capacities of roof racks etc.

We may refuse to load if we consider to do so would contravene the Road Traffic Code 2000.

If unsure please consult the Road Traffic Guidelines.

NOTES :
