

AUIN00477 Intergrain NaturalStain on New Accoya - Treated timber [Exterior]

Description

This specification is a generic exterior finishing system for Accoya treated timber with Teknos AQUAPRIMER 2900-08 in all applications. The recommendation for 3 coats of topcoat is mandatory for external coastal locations.

Substrate and Substrate Preparation

Substrate Notes

Accoya® wood is Radiata Pine timber that has undergone an acetylation process which increases the durability of the timber. While Accoya® wood is stronger than untreated Radiata Pine, it must be treated for protection against black mould. All end grain must be sealed to prevent water ingress.

Substrate Preparation Notes

Pre-primed Accoya timber with Teknos Aquaprimer 2900-08 Primer Sealer Undercoat

Surface Contaminants:

- Light soiling and dust: Wipe down with a clean water damp cloth and allow to dry
- Heavy soiling: Examine the surface for the presence of sap, grease, oil, wax, tannin, building marks, or other contaminants. Scrape off and use scraper to remove dirt and mortar splashes. Clean the timber with a suitable timber cleaner such as Intergrain Ultraprep Timber Cleaner Garden Safe, following pack directions for dilution and application recommendations. Rinse off with clean fresh water and allow surface to dry prior to topcoat

End Grain

Any exposed end grain must be coated with the desired topcoat, noting minimum number of topcoats required.

Coating System Summary

• Primer Teknos Aquaprimer 2900-08 Primer Sealer Undercoat

1st Coat Intergrain NaturalStain
 2nd Coat Intergrain NaturalStain
 Optional Intergrain NaturalStain

| V.O.C. Level <70g/L | | Meets GBCA V.O.C. Requirements? Yes Total Volatile Organic Content (TVOC) values are calculated in accordance to the stated methodology within Green Star Technical Manuals. The TVOC content is theoretically calculated as the sum total of the known VOC values of the product's raw material components. These materials include the base paint plus additional low VOC tinter required for non-factory packaged colours. | | | |
| Coating Application Details Remove excess water from the surfac Stir Intergrain NaturalStain thorough | | | | | |
| It is recommended to test in a small area to ensure satisfaction with the colour and finish prior to staining the whole project; ensure to apply 2-3 coats for the best indication of final colour. | | | | | |
| Apply Intergrain NaturalStain using t airless or airless). Do not use a roller. | Apply Intergrain NaturalStain using the Intergrain DeckBrush (recommended), flat deck applicator, paint brush or spray (air assisted airless or airless). Do not use a roller. | | | | |
| Apply at the coverage rate of 6-12m2/L. Do not overspread or apply thinly as insufficient film thickness will result in lap marks and compromise performance and durability. When coating large areas, work in sections, apply long strokes and use natural breaks in the boards as stopping points. If spraying, it is recommended to back brush to even out the finish and avoid spotting. | | | | | |
| Allow to dry following the recoat time indicated in the section TYPICAL PROPERTIES above, then apply a second coat. If necessary, sand lightly between coats to remove any raised grain. | | | | | |
| A third coat will give extra protection and is required in harsh conditions such as full sun exposure, around pools and in humid areas or if the first coat was applied on damp or porous timber. | | | | | |
| Important: All timber is required to be free from dust, mould and site contaminants prior to coating. Follow all relevant product label instructions when using Intergrain products. Keep freshly coated contacting surfaces such as doors and windows ajar for several days to prevent sticking. | | | | | |
| Maintenance Conduct a routine 12 monthly maintenance inspection. Colour fade is the first sign of need to recoat. Best protection of the timber and ease of maintenance is ensured if Intergrain UltraDeck Timber Stain is recoated before deterioration of the coating and timber underneath occurs. | | | | | |
